

Announcing Data Engineering Training Resources are Now Live

We are proud to announce the **new** Data Engineering training resources and materials are now available on Teradata University!

We now have free web-based training for anyone interested in taking the **Data Engineering Exam** or simply interested in learning more about the topic. You can access the **Data Engineering Curriculum** or access individual courses by linking directly from the **exam objectives**.

Also, similar training is available for the **Analytics** and **Data Science** exams as well.

Any questions please reach out to certification.teradata@teradata.com

Don't Miss on the Opportunity — Get Unlimited Access to the Teradata University

Teradata Customer Education is pleased to announce that we are now bundling two valuable training opportunities.

Purchase a seat in a public live virtual training, receive unlimited access to the **Teradata University** for six months. If your organization subscribes to the Teradata University, you can choose to receive a voucher to sit for a certification exam. This offer is valid until November 30, 2022.

Find a class in your time zone, and check back for added sessions:

[Americas](#) | [Australia](#) | [Europe](#) | [South Asia & Korea](#)

For more information email customer.education@teradata.com.

Quick SQL Bytes — PERIOD data type

Teradata supports **PERIOD** data type along with functions making time related evaluation easy.

Purpose:

A **PERIOD** is an anchored duration (ie: 9am to 5pm). While **INTERVAL** define an un-anchored period (ie: 5 hours). It has a beginning bound (defined by the value of a beginning element) and an ending bound (defined by the value of an ending element).

The representation of the period is inclusive-exclusive; that is, the period extends from the beginning bound up to but not including the ending bound.
